

DIESEL EXHAUST FLUID

WIRELESS MONITORING SOLUTION

SERVICE FEATURES

- ▶ Tank Locator feature – via GPS, cell tower, photographs, address, or map pin – delivers precise tank location information.
- ▶ Provides DEF tote/tank information for location, level, temperature, route planning and more.
- ▶ Delivery Efficiency Report tracks & calculates potential cost savings.
- ▶ One flat-rate monthly fee.

New engines requiring diesel exhaust fluid make running out of product unacceptable. Monitoring your DEF totes and tanks is essential for locating your assets, eliminating run-outs and emergency deliveries, and ensuring product purity throughout the distribution process. Our sole-source solution of wireless monitoring hardware, software and data reporting enhances your operations efficiency by improving resource planning, lowering costs and tightening up your entire supply chain.

Discover how our total system solution and direct customer service model helps maximize efficiency – visit www.TankLink.com or call **1-888-TANKLINK**.

Increased Efficiency

We offer a proactive supply-chain management approach to servicing end-users.

TankLink makes on-site refills seamless when planning your deliveries: where, how much, and how often – keeping your customers supplied more efficiently.

Our Predictive Efficiency Fill Report provides measurable targets and results data to maximize routing and delivery scheduling.

Improved Forecasting

TankData Online gives you 24/7 access to critical tank level information on your PC, laptop, Smartphone or tablet.

- Tank Locator enables asset visibility five different ways, including via GPS.
- Delivery/routing data can be exported to Excel or your routing package.
- Email alerts: low/high temp, critical low, short-fill detection.
- Temperature alerts to ensure product purity and shelf life.

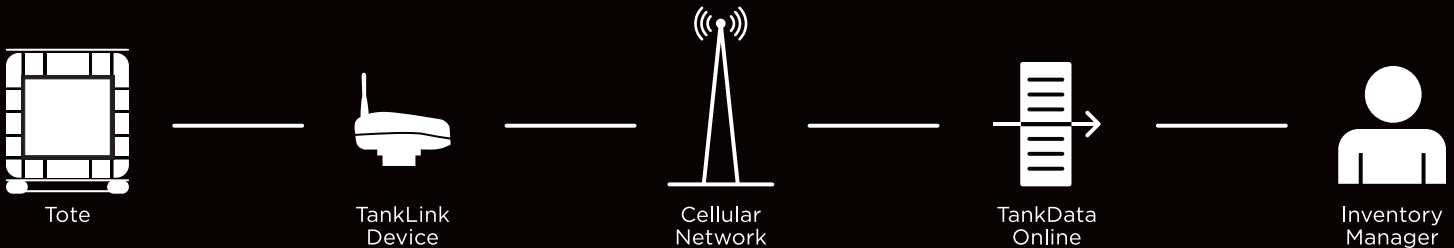

Enhanced Customer Relationship

- TankLink's web app provides the data that gives you the power to know what your customers need before even they know it.
- Now you can make data driven decisions on DEF inventory replenishment and plan the most efficient deliveries. That helps improve your overall customer relationship.
- Partner View feature allows you to safely share tank data with 3rd parties.

TankLink understands the DEF market and its unique storage and distribution requirements. We have been monitoring urea (the primary component of DEF) for more than five years and diesel exhaust fluid for over two. With the proven sole-source DEF-specific wireless hardware and data solution we provide, you can be confident of the storage, handling, replenishment and delivery decisions you make.

Our wireless DEF telemetry units and differential pressure sensors are perfect for tote, mini-bulk and bulk applications. All wetted materials are completely compatible with the product, and communicate vital tank information over a cellular network to the TankLink Communications Center and on to your PC or mobile device.

TankData Online

TankData Online provides highly accurate tank-level information on your DEF inventory, wherever, whenever you need it, at a very affordable price. Your data is safe, secure, and accessible 24/7.

For a detailed consultation, recommendation and quote, and to find out how our total solution increases your operating efficiency and profits, please visit www.tanklink.com or call 1-888-TANKLINK.

Actionable Data, Accurate Decisions

Fill in your company's actual Average Delivery Cost and your Delivery Efficiency Target, and calculate your own potential savings.

Plan the Most Efficient Deliveries

Map-view feature helps you plan the most time and fuel-efficient delivery routes.
